DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- Figures 9-11 show a conductive element comprising a first end portion, a second end portion, an intermediate portion, and two compliant portions wherein the compliant portions being situated between the first and second end portions and the first and second end portions extending inward from each other.
- Figure 19 deals with a DC bus comprising a first conductive element and a second conductive element, each conductive element comprising a first end portion, a second end portion, an intermediate portion, and a compliant portion wherein the intermediate portions of the first and second conductive elements forming positive and negative DC conductor bus plates, respectively.
- Figure 20 deals with a conductive element comprising a first end portion, a second end portion, an intermediate portion, and two compliant portions wherein the compliant portions being situated between the first and second end portions and the first and second end portions extending outward from each other.
- Figures 21-22 deals with a conductive element comprising a first end portion, a second end portion and a compliant portion wherein the compliant portion being situated between the first and second end portions and the first end portion extending inward from the second end portion.

Art Unit: 2839

- Figures 23-24 deals with a conductive element comprising a first end portion, a second end portion and a compliant portion wherein the compliant portion being situated between the first and second end portions and the first end portion extending outward from the second end portion.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2839

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
